

ISLEFACT 'STATE OF THE ISLANDS' REVIEW PROGRAMME

WHY SUBSCRIBE TO THE REVIEWS & BRIEFING PAPERS

Drawing upon decades of island economic and social research experience, including presentations at international agencies and development forums, a comprehensive selection of key economic, social, and environmental subjects relevant to islands has been identified including key island trends, data, and strategic analysis affecting island communities.

To this end, exclusive 'State of the Islands' Reviews are now being generated together with regular Briefing Papers. These are designed to provide expert insights for island strategy and operational decision-making and clear, evidence-based guidance for policymakers and business leaders.

REVIEW FORMAT & TOPICS INITIALLY COVERED

Each monthly 30/40 page Review will feature a particular topic, chosen for its significance to island-based organisations. Island best practice will also be highlighted whenever relevant and, over a twelve months' rolling cycle, a broad sample of islands including the three Crown Dependencies will be referenced.

The following key island topics are the first four subjects addressed:

- **Review 1:** Fiscal Challenges
- **Review 2:** Population and Demography
- **Review 3:** Health and Long-term Care
- **Review 4:** Labour and Employment

In addition, regular Briefing Papers will be published which will provide detailed assessments of global and regional issues of primary importance at the time and which have a direct impact on islands generally.

Throughout the ongoing programme, attention will also be given to the persistent challenges posed by critical mass and economies of scale, recognising these as constant factors influencing island development and policy.
